DATA SYSTEMS ANALYST · DATA QUALITY & GOVERNANCE

PROFILE

Data and systems analyst with **8+ years** making business data accurate, consistent and trustworthy across **multi-system environments** (HSBC, Trustwave, Zimmer Biomet, ISS). I **integrate data across multiple enterprise systems** into a single source of truth (at HSBC: Clarity, GPDM and Cognos), design **data-quality checks and validation**, and trace **breaks and inconsistencies** as data moves between systems, working with IT and data-platform teams to resolve them. I write and interpret **SQL (Advanced)** to interrogate data, document **data flows, metric logic and acceptance criteria**, and build **reporting and dashboards on KPIs** for senior stakeholders and the Board. I have worked in **regulated environments** (banking, pharma, cybersecurity), handling sensitive personal and financial data under **data-protection and compliance controls**, and have supported **internal audits**. Self-directed and comfortable operating without a pre-built framework.
