DATA ANALYST · ANALYTICS & AI AUTOMATION

PROFILE

Data analyst with 8+ years in BI, reporting and analytics across international environments (HSBC, Trustwave, Zimmer Biomet, ISS). Strong SQL and data modeling: I connect, join and transform data from multiple systems into a single source of truth, then turn it into dashboards, scorecards and recurring reporting that leadership actually uses. Hands-on AI adopter: I use LLM tools (Claude) daily and build AI agents, scheduled tasks and automation pipelines in my own projects: a job-market data pipeline, a relational assistant chatbot and a daily-content agent. Comfortable with ambiguity and stakeholder storytelling, with a clinical psychology background (SWPS) that brings genuine affinity for people and talent analytics. Proactive about spotting bottlenecks and improvement opportunities, not just answering questions.

PROFESSIONAL EXPERIENCE

Senior Analyst · BI and Performance Management OCT 2024 - MAR 2026

Trustwave Sp. z o.o. · Cybersecurity · Warsaw / Remote

- Built and maintained dashboards, scorecards and KPI reporting for the CFO and Financial Directors: semantic models, DAX measures, drill-through and trend views leadership relied on daily.
- Connected and transformed data from multiple sources using Power Query (M), Alteryx and SQL; optimised refresh cycles to keep reporting timely and consistent.
- Translated ambiguous business questions into clear KPI definitions, data models and insight; documented metric logic and acceptance criteria.
- Proactively flagged data-quality issues and improvement opportunities; ran training on Power BI and self-service analytics for business users.

IMPACT · Replaced fragmented Excel reports with a governed semantic layer and a single, consistent set of KPIs adopted directly at C-level.

BI Developer at HSBC JUL 2022 - APR 2024

Alten Polska Sp. z o.o. · Banking · Krakow / Remote

- Built a single source of truth for a 5-analyst team at global bank HSBC: integrated 3 enterprise data sources (Clarity, GPDM, Cognos) into one unified data model with SQL, Power Query and DAX.
- Delivered dashboards for people-cost forecasting and allocation across a \$15M pool and ~40 IT projects; surfaced trends and outliers for decision-makers.
- Partnered with IT architecture and data platform teams; documentation and user training enabled the shift to self-service reporting.

IMPACT · Diagnosed fragmentation across 5 analysts and consolidated their inputs into integrated, reusable models that cut manual reporting work.
