PROFILE

Business and data analyst with **8+ years on Data, Analytics and controlling projects** across banking, cybersecurity, medical devices and facilities (HSBC, Trustwave, Zimmer Biomet, ISS). I sit between business and technology: I **gather requirements, map business processes and data flows, and translate business needs into clear technical specifications and metric definitions**. With **advanced SQL, expert Excel / Power Query and Power BI (DAX)** I model multi-source data and build the controlling and KPI reporting that finance and senior stakeholders rely on, backed by rigorous **data validation, documentation and governance**. I work in a **consultative way**, diagnosing client needs and enabling self-service. **Native Polish** and fluent English; comfortable in dynamic, shifting-priority environments.
